

A sound is quiet

Friction Series

POINTS

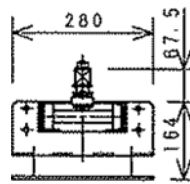

- This machine is compact drive structure by drive pulley miniaturization.
- Possible to low height of the facilities for the chain-less.
- Reduce the garbage, dust for the chain-less.
- The decreases of the running cost of facilities.
- Possible to high speed transportation (40m/min.)
- Possible to change and increase of the facilities freely, and the pair with FJ II and FJ III can do it, too.
- The design that sutable to OHC, FLC and transport work is possible.

Main Specification

FJ II / F

- Transfer weight Max.70kg
- Transfer speed 40m/min.
- Horizontal rail Min.1000R
- Transfer pitch Upper 600mm

FJ III / F

- Transfer weight Max.300kg
- Transfer speed 40m/min.
- Horizontal rail Min.1500R
- Transfer pitch Upper 600mm
